HOW DID THE FUND PERFORM LAST YEAR AND WHAT AFFECTED ITS PERFORMANCE?

The Aptus April Buffer ETF (“APRB” or the “Fund”) underperformed by 3.43% versus the S&P 500® Index (the “Index” or “Benchmark”) since inception (October 13, 2025) based on NAV performance. During that time the Fund returned 5.59% at NAV while the Index was up 9.02%. The Fund seeks to provide investors with returns that match the share price performance of the SPDR® S&P 500® ETF Trust (“SPY”) up to a predetermined upside Cap, before fees and expenses, while providing a Buffer of 15%, before fees and expenses, over a full investment period. By design of the Fund’s strategy, due to the Cap, it is expected that the Fund will underperform relative to its Benchmark in upward trending markets. The Index delivered strong performance for the fiscal period ending April 30, 2026 as momentum in mega-cap technology stocks and enthusiasm surrounding Artificial Intelligence continued even with very volatile performance across several other sectors.

HOW DID THE FUND PERFORM SINCE INCEPTION?*

The \$10,000 chart reflects a hypothetical \$10,000 investment in the Fund. The chart uses total return NAV performance and assumes reinvestment of dividends and capital gains. Fund expenses, including management fees and other expenses were deducted.
